HealthCasts Media / Front End Developer

Jul 2021 - PRESENT, New York, NY

- Developed and maintained custom responsive web solutions, ensuring cross-browser compatibility and mobile responsiveness
- The only developer for the team and handled all front end dev work.
- Created visually appealing and responsive HTML email templates that worked across various email clients and devices.
- Familiarity with AWS services relevant to image handling, such as Amazon S3 for storage.
- Our clients focused on disease, patient, treatment and practice-related medical information.

AirTank / Front End Developer

Oct 2020 - Jul 2021, Peterborough, NH

- Created responsive landing pages for both airtank.com and ziftrshop.com.
- Used Zeplin to convert designs into full HTML pages.
- Made edits to both WordPress and Shopify themes/sites.
- Created Shopify templates.
- Used Git and Jira to keep track of tickets and code modifications.

Craft Studios Boston LLC / Front End Developer

Jan 2019 - May 2020, Framingham, MA

- Created and led large responsive landing pages weekly on a team of two for Staples.com
- Collaborated with multiple internal teams including project management and creative to execute on multiple projects at a time.
- Used Sketch to convert designs into functional HTML pages.
- Used Photoshop to edit/create new images for Staples.com
- Used Bitbucket and Git to handle code modifications.

Advanced Remarketing Services / Web Developer

Aug 2015 - Dec 2018, Middletown, RI

- Developed websites and web applications that allow users to easily donate their cars online. This includes creating user-friendly interfaces and optimizing for performance.
- Setting up databases to securely manage donor information, vehicle details, and donation records.
- Worked on the front and back end of the mBid platform used on www.arscars.com. The mBid platform allows buyers to place bids on vehicles via web and mobile.

Precision Design Studios / Web Developer

May 2014 - Aug 2015, Providence, RI

- Customized SFCC(Salesforce Commerce Cloud) formerly known as Demandware, templates and components to align with the specific requirements of the e-commerce site.
- Developed user interfaces for e-commerce websites using HTML, CSS, and JavaScript to create visually appealing and responsive

layouts.

- Worked with the following clients: FILA, Lucy, Rocky Boots, Pacific Coast Feather, Hanover Direct, Burts Bees Baby.
